NINTH-STREET M. P. CHURCH.

At the Minth-street Methodist Protestant
church the subject in the morning was—
"The Prophet's Lament, Coofession and
Entreaty"—based upon the 7th, 8th and 9th
verses of the 14th chapter of Isalah. The
text expressed in metaphors of great oriental beauty and vigor. Transposing the language to sult the arrangement proposed, we
notice:

and living voice and holy firs? Oh for the fame and breath and power of the spirit! The lamentation and confession, lead us to—III. The Katresty: "Leave us not." It implies a true repeutance. We must remove every accursed thing from the camp. Then may we expect the constant and not the occasional presence of God. Let us lament our personal deadness to Units. Let us confess our fauit. Oh it is a dreadful state when the head of the church no longer wat's in the midst of the golden candle-states, where a Christiess church moves on in its lifeless coremonical all unconscious of her absent head. But surely the is not our state. We know, at least, our danger. We see the receding person of our Lord, and join the cry, "leave us not!" Leave us not, let the grey hairs of a spiritual decline be been and there upon us, and we know it not. Let us gird ourselves anew, let us strike upon our shelds and invite the conflict—let us any—

The services were concluded with the administration of the Lord's Supper. It is

NEW YORK AVENUE PRESENTERIAN CHURCH.

The attendants at this church yesterday morning were fortunate in hearing a discourse from the Rev. Mr. Simpson, which for elegance of language and beauty of diction, for historical research and vigor and terseness of style, we have seldom heard excelled.

His description of the Christian Church with the wise, the great and the noble who were of the world, was aliquintly happy and full of pathos and of great power, and the whole sermon an intellectual and spiritual treat which will not soon be forgotten by those who heard it.

Pax.—The high prices of wood and cosl prevailing here during the fall and winter seasons for several years past have called attention to peat as an article of fuel, and it is said that a joint stock company will shortly be formed in Washington for the purpose of introducing it in this market. At the present time there is a proposition before the City Councils, from Mr. Louis Baker, an old cill-zen of much experience in such matters, to use peat as a decoderizer of night-soil, and practical tests in that direction pronounce favorably to its introduction. Peat is a decomposed mass of fibrous roots, leaves, &c., and a found in various parts of the world, along river sides and such localities. That which has been discovered by Mr Baker is said to be of a very fine quality, with little or no earth intermixed, and consequently almost wholly a vegetable matter. Samples have been placed in possession of several gentificants have within the past week, who have experimented with it as a substitute for each or wood, and the result is said to be most satisfactory.

Liquon Cassa.—About four weeks ago Mr. Barry and Mr. Clark were such before Eaquire Clark by the Levy Court. It receive fifty dollars from each for an alleged violation of a by-law of said court prohibiting the saie of spirituous liquors in the county without a license. After several postponements the cases were tried, and resulted in a defeat of the Levy Court. A short time before Mr. Meyer, Mr. Schneider, and Mr. Lewis were sund by the city before Eaquire Wail for selling lager beer without license. Mr. Meyer was discharged, Mr. Schneider was fined, and Mr. Lewis case continued. On the same day Mr. Herbert was such by the city before Eaquire Wail for selling intoxicating drinks without license, and was discharged.

New Engine House.—The workmen are engaged, in the Seventh ward, in putting up a new building for the corporation to be used as an engine house for the proposed new company to be formed. The building is located on the south side of Virginia avenue, between Four-ani-a-baif and Sixth streets, near the public school-house. The side walls are going up very fast, and the building will be under cover before many days.

CENTRE MARKET. — This old cyc-sore, which is a standing disgrace to our city, we are glad to notice now presents some show of respectability, the Cierk, Bidney McFarland, having had the exterior of the buildings thoroughly coated with whitewash, and the interior somewhat purified through the same means. As far as lies in the power of the cierk, the market has been rendered as comfortable as possible to dealers and purchasers.

comfortable as possible to desires and pos-chasers.

An anyicus appeared in this paper on Thursday last in relation to an alleged re-fusal of a cierk to pay a board bill. We have since learned that there are two sides to the story, and that in the Department where he is employed, and where the rule is to discharge cierks for non-payment of just board bills, the case has been thoroughly examined, and Mr. Reed not only ex-onorated, but subsequently promoted.

TEMPERANCE.—A public temperance meeting was held under the auspices of Howard division No. 7, Sons of Temperance, in the park cast of the Capito building, yesterday, at 3:30 p. m., Rev. C. W. Dennison presiding. Addresses were delivered by Messra. Ed. Coombs, Allen Coffin, John Donovan and Dr. Jos. Waish. All the specches were of an earnest, cloquent character, and were well received by the audience assembled.

The calculation now in use by the Jews dates back to the year A. D. 385, when the Council of Mes was held, but some Jewish writers hold that the Council borrowed from Meton and Euclemen's "Calculations to the Greeks assembled at the Olympic Games," which were compiled 755 years before. Be Meton and Euctesson's "Calculations to the Greeks assembled at the Olympio Games," which were compiled 735 years before. Some months ago the firm, with a view to the calargement of their business, effected a lease of the store-ro-og, on the Avenue near Ninth street, lately vacated by Mr. H. O. Hood, the jeweler. For reasons not necessary to mention a change in the original plan was made, and instead of a tobacco enporting we find, the beautiful store-room operated or datarday evening as as elegant hat and cap store, with a magnificent stock of entirely area goods. Mr. Cochran and his associates are fully competent to conduct the new husiness, and we hesistate not to prophesy an entire success for the firm in their new role. The store has been beautifully fitted up, with glass cases on either side, the ornamental moulding, with which they are capped, being alike neat and elegant. The drawers, which form the base of the cassas are grained in oak, while the other portions of the wood work is painted in glass white, thus presenting a pretty contrast. The three-dided mirrors, four of which are arranged, are a feature of the establishment, and an improvement on anything of the kind ever placed in position in Washington. In the rear of the store is a handsomely-furnished office-room, while at the front two splendid show-windows and in making an at imposing street display.
